

SLIPS, TRIPS & FALLS SAFETY TIPS

FFVA Mutual's Safety *Solutionists* are here to help you identify and eliminate slip, trip and fall hazards to keep your employees safe.

8 Tips to Prevent Slips, Trips and Falls at Work:

1	Implement Good Housekeeping: Clean spills immediately and properly store tools and materials.
2	Ensure Proper Footwear: Require non-slip safety shoes to reduce slipping and tripping risks.
3	Design Safe Workspaces: Apply slip-resistant coatings, install handrails and secure elevated surfaces with railings.
4	Install Adequate Lighting: Make sure all areas are well-lit and use motion-activated lights for outdoor work.
5	Post Clear Signage: Use signs like "Caution: Wet Floor" to warn employees of potential hazards.
6	Take Weather Precautions: Place absorbent mats at entrances and ensure proper drainage during rain, snow or icy conditions.
7	Hold Regular Safety Meetings and Training Events: Conduct safety meetings to reinforce safe practices and reduce accidents. Remind employees to walk safely, use handrails and stay aware of risks.
8	Conduct Routine Inspections: Check surfaces frequently for hazards like uneven floors, damaged carpets and holes. Inspect stairs, railings and surfaces to keep them free of debris or grease.
